SUMMARY

I love writing code. I also love working with people, being part of the big picture strategy conversation, and finding innovative ways to use technology to solve problems.

WORK EXPERIENCE

2003 - 2018 **Co-founder, Technology Director**
Blue Sky Collaborative

Architect and lead developer of our flagship platform, SWEET, which has been used by hundreds of nonprofit organizations to raise over \$200,000,000.

Executed a variety of roles and functions to help grow the business, including brand design, product management, business development, and strategic planning.

Collaborated with clients to develop their online fundraising strategy and KPIs.

Managed, mentored, and trained junior developers and contractors.

Built scalable applications for fundraising, social networking, and charity event management that include:

- Reporting and data analysis tools
- Integration with payment gateways, CRMs, e-marketing systems and donor management systems
- Back end APIs for use by external developers and mobile platforms
- Cutting edge design

2002 - 2003 **Informatics Developer**
ALS Therapy Development Institute

Partnered with fundraising and marketing departments to create a multi-tiered online presence.

Led the development of the organization's ground breaking online grassroots fundraising platform, adding vital revenue stream and constituent engagement resources for the company.

Helped build and maintain a proprietary Laboratory Information Management System for use by scientists.

2001-2002 **Webmaster**
Creative Allies/Gentlepeople Ltd.

Led the development of a fully-featured online-dating application.

Built and maintained the company's two marketing websites and partnered with the event management and match-making teams to provide them with key technology resources.
